Service... and QUALITY!

Your home is your finest social asset and your appearance in the eyes of your neighbors, friends and associates can be no nicer than the setting in which you live. We at OAK PARK take pride in knowing that our best advertisements aren't *written*—they're *growing* into beautiful specimens around the homes of literally thousands of satisfied customers. We'll gladly send you a list of those in your vicinity.

Founded in 1888, this business has been under the same family management for almost forty years. Although we realize that the age of a business does not in itself guarantee its performance or its future, we like to think that ours has not grown old with the years, but has stayed young and vigorous. Knowing that we can continue to prosper only in proportion to the satisfaction we give our customers, we hold *service* and *quality* foremost in our aim to please.

Expert Landscape Service is Yours for the Asking!

Not everyone has the knowledge or time to undertake his own landscape planning and planting. So we offer our qualified landscape organization, capable of planning and executing practical and attractive plantings in the most modern and efficient manner. Excepting extensive and detailed plans, there is no cost or obligation for our advisory service, cost estimates, or plans and sketches. It's our way of creating good will. So, whether you're building a new home or want to add to or renovate your present plantings, our landscape designers are ready to help you.

Mr. Edward J. Anderson is in charge of this work in western Long Island and Mr. John J. Murphy in eastern Long Island. Both men are officers of our company, college graduates in landscape architecture and horticulture, and have years of experience behind them.

Phone or write for an appointment with one of them on your grounds. GRover 5-0232.

It's EASY to Order

**We Try to Do Business the Way You
Like it Done—Not Just to Suit Us**

It's easy to order your plants from Oak Park, whether you need only a few which you intend to plant yourself, or whether you want us to do a complete landscape planting for you. You may visit the nursery and select your plants, either at our sales display area (open from March through Christmas) or in our 70-acre nursery. You may take your plants with you, or we'll deliver. If you prefer to order from the comfort of your living room, our representative will bring you complete information, including color slides to illustrate particular plants. And our skilled plantsmen will do a careful job of planting for you if you wish.

Included among our services are transplanting, pruning and fertilizing trees and shrubs, fertilizing lawns, and installation of garden features such as walls, patios, fences and outdoor lighting. Our complete service minimizes divided responsibility.

Mr. Wm. F. Hauser, our Nursery Supt., is in charge of growing and shipping.

Miss Marie K. Brophy is in charge of billing and handling your account.

We Are Members of:

New York State Nurserymen's Association
Long Island Nurserymen's Association, Inc.
National Landscape Nurserymen's Association

DECIDE NOW to Have the Best

Landscaping Is a Long Term Investment So . . .

Don't Compromise on Quality

What is a Bargain?

In buying trees and shrubs, just as in buying anything else, the only *real* bargain is quality. It takes from 2 to 10 years to grow a salable tree or shrub for quality landscape planting. During that time it receives many hours of painstaking and skillful care—pruning, fertilizing, cultivating, spraying, and irrigating—so we can offer it to you as a healthy, vigorous plant that can be successfully transplanted to give you what you want and deserve.

May we offer a bit of sound advice in the way of three means of learning just how much of a "bargain" you are being offered? (1) Ask to see a membership card in the regional or state Nursery or Landscape Association

**YOU ARE CORDIALLY INVITED TO VISIT
THE NURSERY TO MAKE YOUR OWN
SELECTIONS OR JUST TO BROWSE AROUND**

(Long Island has over 70 members), (2) Ask to see several of his landscape jobs near you, and (3) Ask to see some of the plants he proposes using on *your* job.

If You Don't Know Trees, Know Your Nurseryman!

In the nursery and landscape business, particularly during boom building years, there are many firms and individuals offering their products and services. Most of them are qualified to serve you well. But they are sometimes overlooked in the light of the bitter experiences we occasionally hear about from a home owner who was "taken". There are just enough of these untrained, unprincipled fellows around to hurt the reputation the rest of us have worked so hard to attain.

KEEP AMERICA BEAUTIFUL

Page 3

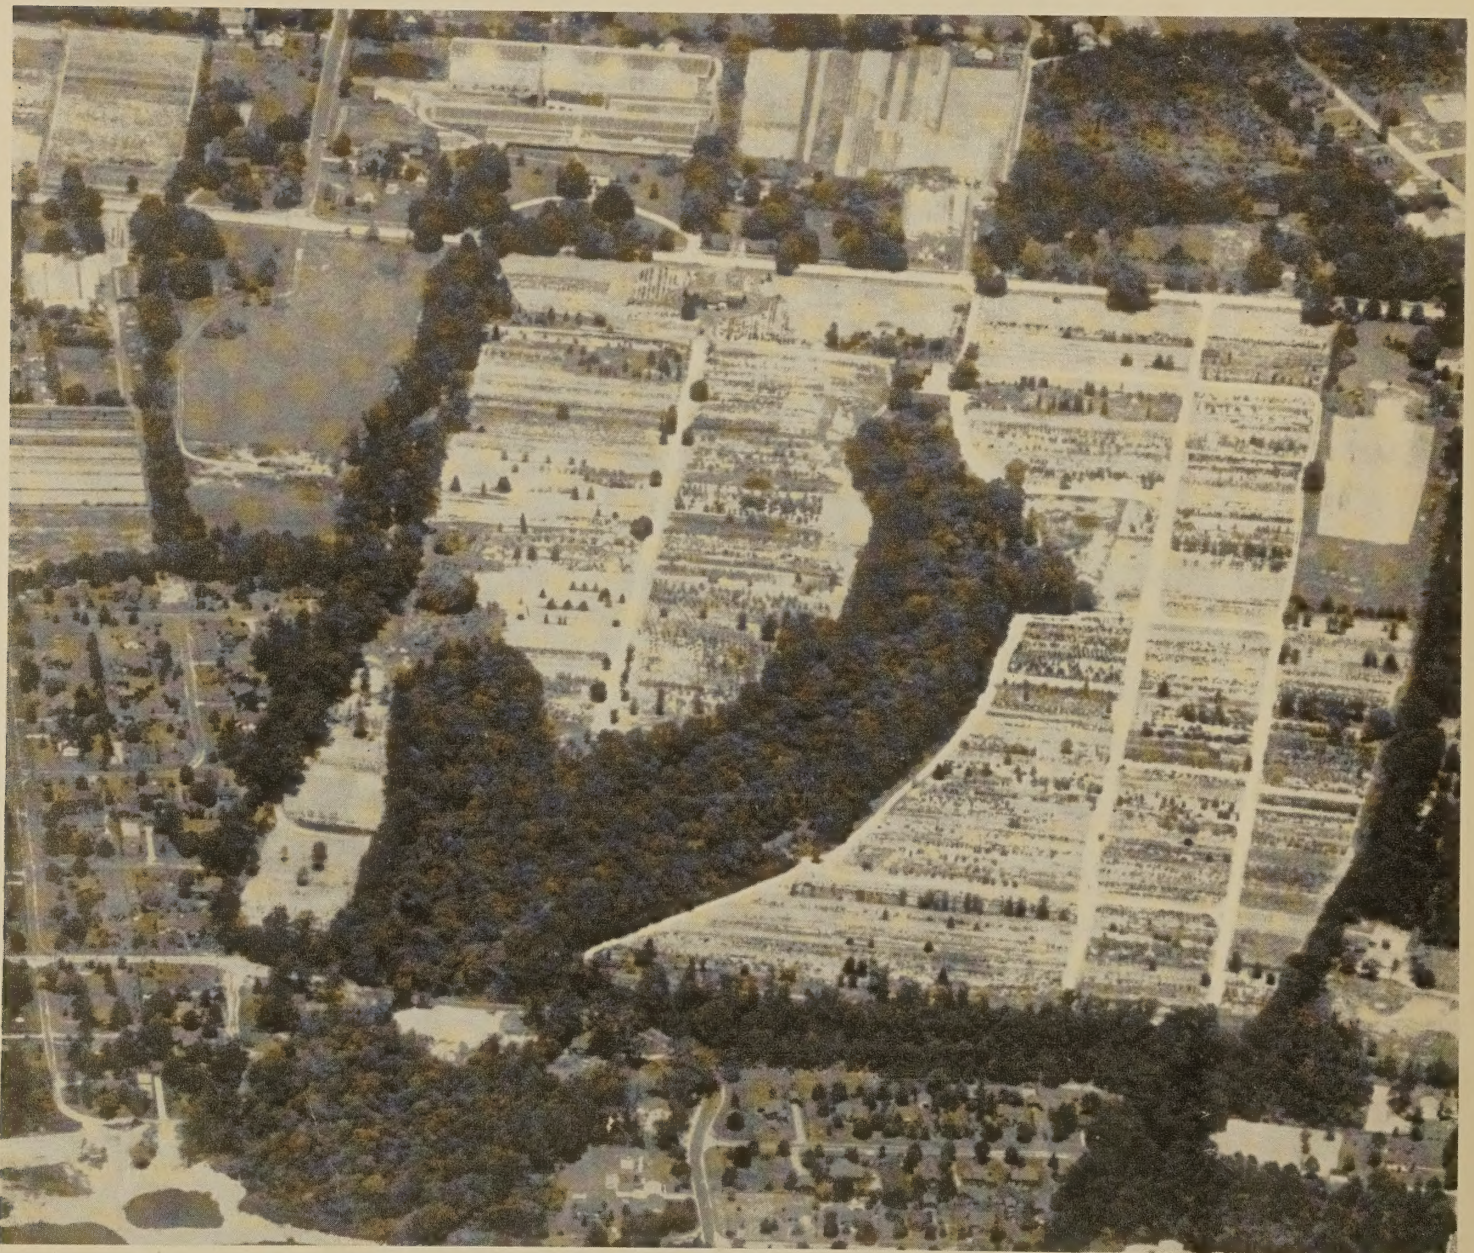

At *Oak Park* YOU DEAL WITH NURSERYMEN

As nurserymen, we have *lived* with the plants you buy. We have grown most of them from "infancy" and have given them as fine a start in life as we know how. There's a *big* difference between OAK PARK trees and shrubs and many being offered from "who knows where".

Our nursery is beautifully laid out with a well marked visitor's route, over which you are cordially invited to drive whenever and as often as you wish. Many of our customers make it a point to drive through the nursery several times a year. May is the spectacular month for blossoms, but at any time of year the tour provides a display of Nature's beauty, including some wildlife not often seen on Long Island these days.

The nursery is open every day . . . the office every day except Sunday.

This aerial view of our 70-acre nursery illustrates that we are *growers*, not just landscapers.

FAIRCHILD AERIAL SURVEYS, INC.

Flowering and Fruiting CRABAPPLES

*A Delight to Behold
All Year 'Round*

In May the Flowering Crabapples are literally covered with glorious blossoms. All summer they are heavily clothed in foliage, even offering an appreciable amount of shade as they mature. And in autumn (as though they hadn't *already* contributed enough beauty!) these lovely trees again add a spectacular touch of color by bearing showy clusters of colorful fruit. Plant them as lawn specimens, among evergreens, in the border, or as an accent, either in or off the corner of a building. Your garden deserves at least one Flowering Crabapple.

You will be interested to know that Flowering Crabapples come to us from the Orient, where they have been cherished for thousands of years. Some kinds are upright, others spreading and more mound-like. Some are full and quite formal, others open and irregular. Rapid growers or dwarfs, their blossoms range from white through blush-pink to deep rose-red. The miniature, apple-like fruits are yellow, bright red or rich maroon, some very attractive to the birds.

Among our better varieties are Carmine Crab (*Malus atrosanguinea*), Dolgo Crab, Eley Crab, Japanese Crab (*M. floribunda*), Hopa Crab, Red Silver Crab, Sargent Crab, Almey Crab, Scheidecker Crab and Zumi Crab.

Shade Trees and Ornamental Flowering Trees

The First Requisite of Good Landscaping

No other group of plants offers so much beauty and comfort as trees. Their shade will bring new life to the most barren situation. Their masses of colorful blossoms, foliage and fruit will lend a new charm to any surroundings. We grow many more than these few and we welcome your inquiry regarding trees not listed. Numerals indicate approximate ultimate height without pruning.

Large Trees

Norway Maple (*Acer platanoides*). 75 ft.

Pyramidal Norway Maple (*Acer platanoides pyramidalis*). 75 ft.

Schwedler Maple (*Acer platanoides schwedleri*). 75 ft.

Crimson King Maple (*Acer platanoides schwedleri nigra*). 75 ft.

Red or Swamp Maple (*Acer rubrum*). 75 ft.

Sugar Maple (*Acer saccharum*). 75 ft.

Maidenhair Tree (*Ginkgo biloba*). 120 ft.

Locust. *Gleditsia* in variety. 60 ft.

Sweetgum (*Liquidambar styraciflua*). 60 ft.

Tulip Tree (*Liriodendron tulipifera*). 80 ft.

Pepperidge or Tupelo (*Nyssa sylvatica*). 60 ft.

London Planetree (*Platanus acerifolia*). 80 ft.

Oak. *Quercus* in variety. 75 ft.

Golden Weeping Willow (*Salix niobe*). 40 ft.

Linden. *Tilia* in variety. 70 ft.

Elm. *Ulmus* in variety. 80 ft.

Sawleaf Zelkova (*Zelkova serrata*). 90 ft.

Small Trees

Red Japanese Maple (*Acer palmatum atropurpureum*). 20 ft.

Mimosa or Silk Tree (*Albizia julibrissin rosea*). 35 ft.

Flowering Peach (*Amygdalus persica*). 12 ft.

White Birch. *Betula* in variety. 40 ft.

American Redbud (*Cercis canadensis*). 40 ft.

White Dogwood (*Cornus florida*). 25 ft.

Pink Dogwood (*Cornus florida rubra*). 20 ft.

Chinese Dogwood (*Cornus kousa*). 20 ft.

Hawthorn. *Crataegus* in variety. 20 ft.

Franklinia (*Gordonia alata*). 20 ft.

Goldenrain (*Koelreuteria paniculata*). 30 ft.

Goldenchain (*Laburnum vossii*). 30 ft.

Magnolia. *Magnolia* in variety. 20 ft.

Flowering Crabapple. *Malus* in variety. 20 ft.

Sourwood (*Oxydendrum arboreum*). 40 ft.

Purpleleaf Plum (*Prunus cerasifera*). 12 ft.

Oriental Flowering Cherry (*Prunus serrulata*). 20 ft.

Mountain Ash. *Sorbus* in variety. 30 ft.

Have you seen Brooklyn Botanic Garden's booklet "The 100 Finest Trees and Shrubs"? Each selected plant is illustrated and described, including hardiness rating, culture, and landscape uses. This booklet belongs on the bookshelf of every plant lover. Send \$1.00 to Brooklyn Botanic Garden, 1000 Washington St., Brooklyn 25, N. Y.

Oak Park Nurseries grows 75 of the 100 recommended plants. Four of the remaining 25 are not hardy on Long Island.

Flowering Cherry

An early harbinger of spring, these lovely trees become more popular each year. With their delicate blossoms from snow-white to deep pink, they attract thousands of visitors every spring to the display on the Mall along the Potomac River in Washington, D. C. We have specialized in growing them for many years and grow six of the very best varieties, including the weeping form, which is a "waterfall" of pink blossoms in mid-April.

Oak Park ORNAMENTAL TREES

For Lasting Shade and Beauty

AND SHADE TREES

WHITE AND PINK DOGWOOD

The Colorful DOGWOODS

(Cornus)

Small trees that attain a height of about 20 ft., admirably suited to today's low architecture. Produce a wealth of white or pink blossoms in early May, brilliant red foliage and scarlet berries in clusters in fall, attractive to the birds.

The Graceful MIMOSA

(Albizia)

Mimosa, sometimes called Silk Tree, is a lovely, broad-spreading tree with refined, fern-like foliage. Its delicate pink blossoms are borne in feather-like clusters in July, Aug. and Sept. Mimosa does not grow over 35 ft. tall, so is especially adapted to today's homes.

WHITE BIRCH

(Betula)

Nearly everyone likes this tree and wants at least one. It grows with single or multiple stems with creamy white bark. Grows about 40 ft. tall. A striking accent, particularly when backed by dark foliaged evergreens.

GOLDENCHAIN TREE

(Laburnum)

Upright and quite formal as a young tree, it spreads somewhat with age, growing about 30 ft. high. Bears long, graceful pendants of bright yellow blossoms in June. Bark is light green. A spectacular show of color and an unusual tree.

THORNLESS HONEYLOCUST

(Gleditsia)

This tree has a broad, spreading crown with a canopy of lacy foliage that casts light, airy shade. A rapid grower to a height of 60 ft., it is free of insect attack, very hardy and long-lived. Well suited as a patio shade tree. Tolerates more seashore exposure than most trees.

CRIMSON KING MAPLE

(Acer)

A patented tree (Plant Pat. No. 735) that grows slowly to a height of perhaps 75 ft. with a broad, rounded head of large leaves, casting dense shade. Retains its glossy, deep maroon foliage throughout the season until November. Same color effect as Copper Beech at less cost.

ORIENTAL CHERRY

(Prunus)

On page seven we told you a little about these trees. The one pictured below is variety Kwanzan, named for a Japanese mountain. Grows about 20 ft. high. It bears deep pink blossoms in late April, followed by coppery young leaves that turn rich, dark green in summer.

MOUNTAIN ASH

(Sorbus)

Produces large, showy clusters of orange or red berries in late summer on a nicely formed tree that grows about 30 ft. high. Popular as a street tree in Canada. Very attractive to the birds.

ORIENTAL CHERRY

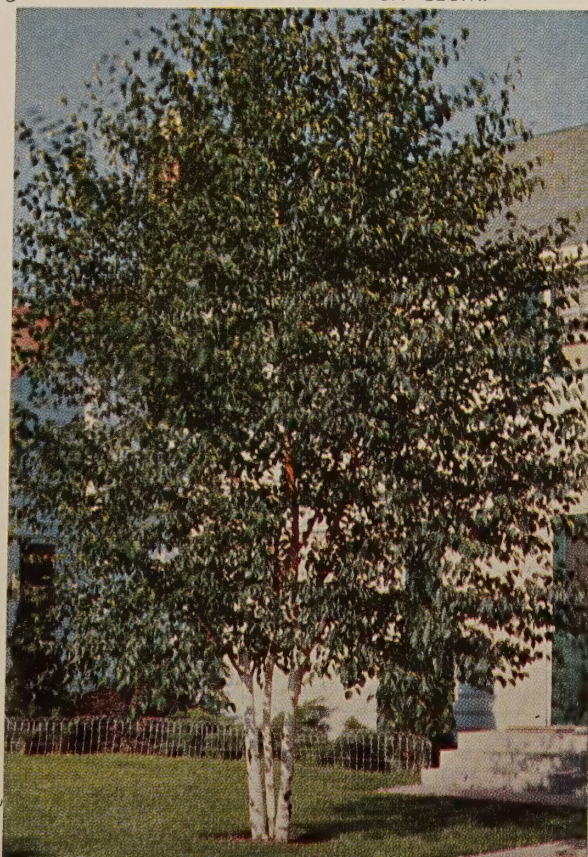

The Berried Hawthorns

(Crataegus)

Reaching a height of 15-20 ft., these trees bear white or pink blossoms in May and June. We grow six varieties and particularly recommend Washington Thorn (C. phaenopyrum) with its showy clusters of red berries and maroon foliage in autumn, and Carrier Thorn (C. carrierei) with its lustrous, bright green foliage and large individual orange-red berries.

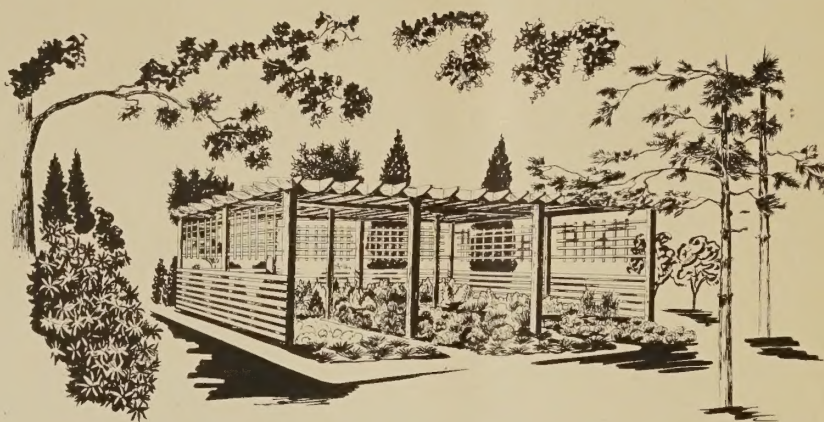

PINK HAWTHORN

Oak Park's "Ready-To-Go" Sales Area

In an attractively laid out area nestled among stately oaks and pines adjacent to our office, you'll find on display during the planting season an unusually wide selection of the best shade and ornamental trees, flowering shrubs, vines, ground covers, roses and fruit trees, as well as peat moss and fertilizers. All plants have large descriptive labels and are conspicuously priced, so you may browse around to your heart's content, either with or without the help of a salesman. We've learned that most people prefer to shop for plants in this leisurely way, rather than in supermarket style on a busy highway, where it is often noisy, hot and dusty. *It's cool and comfortable here.* Come in often and stay as long as you please.

In this sales display you'll see hundreds of plants growing in containers—wire baskets of our own design and manufacture, metal cans, asphalt, aluminum and paper pots, and redwood planters.

If you're not familiar with the advantages of handling certain plants this modern way, be sure to see how it extends the planting seasons, facilitates handling, and reduces transplanting shock.

At the Christmas season you'll find this area devoted to a gay presentation of selected Christmas trees, holiday greens and choice accessories.

Mr. William M. Arnott, in charge of this department, is looking forward to your visit.

Seashore Planting

Many of our customers call on us to do plantings in locations exposed to high winds and salt spray. Unless the existing conditions are given very careful consideration and the planting is planned wisely, plantings of this nature can be disappointing. We have worked many years with seashore plantings and approach them with a conservatism that comes with experience. Ask us for more complete information and a plant list tailored to your particular situation.

Listed below are some of the plants adaptable to seashore locations, the actual selection depending upon the severity of exposure.

Trees

Birch

Siberian Elm

Boxelder

Golden Weeping Willow

Locust

Planetree or Sycamore

Evergreens

Austrian Pine

Japanese Black Pine

Colorado Spruce

Mugho Pine

Here Are Some of Our Best (Deciduous)

FLOWERING SHRUBS

**Colorful Spring and Summer Blossoms—Full Summer Foliage
Brilliant Autumn Leaf Color—Attractive Winter Branch Patterns**

Use them for summer privacy screen plantings, in borders, for hedges, as a background, and as individual specimens. We grow many more than these and we welcome your inquiry regarding shrubs not listed. Numerals indicate approximate ultimate height without pruning.

Fiveleaf Aralia (*Acanthopanax pentaphyllum*). 8 ft.
Shadblow (*Amelanchier canadensis*). 30 ft.
Red Chokeberry (*Aronia arbutifolia brilliantissima*). 8 ft.
Deciduous Azalea. *Azalea* in variety. 3-5 ft.
Spicebush (*Benzoin aestivale*). 12 ft.
Japanese Barberry (*Berberis thunbergi* and varieties). 1-4 ft.
Butterflybush (*Buddleia davidi*). 8 ft.
Beautyberry. *Callicarpa* in variety. 4 ft.
Sweetshrub (*Calycanthus floridus*). 5 ft.
Bluemist. *Caryopteris* in variety. 4 ft.
Summersweet (*Clethra alnifolia*). 10 ft.
Cornelian Cherry (*Cornus mas*). 20 ft.
Smoke Bush (*Cotinus coggygria*). 12 ft.
Cotoneaster. *Cotoneaster* in variety. 2-6 ft.
Flowering Quince (*Cydonia japonica*). 5 ft.
Scotch Broom. *Cytisus* in variety. 10 ft.
Deutzia. *Deutzia* in variety. 3-6 ft.
Russian Olive (*Elaeagnus angustifolia*). 12 ft.
Autumn Elaeagnus (*Elaeagnus umbellata*). 12 ft.
Redvein Enkianthus (*Enkianthus campanulatus*). 12 ft.
Burning Bush (*Euonymus alatus*). 10 ft.
Forsythia. *Forsythia* in variety. 4-8 ft.
Rose of Sharon (*Hibiscus syriacus*). 12 ft.
Hydrangea. *Hydrangea* in variety. 4-10 ft.
St. Johnswort. *Hypericum* in variety. 2-6 ft.
Winterberry (*Ilex verticillata*). 10 ft.
Beautybush (*Kolkwitzia amabilis*). 8 ft.
Privet. *Ligustrum* in variety. 6-10 ft.
Bush Honeysuckle. *Lonicera* in variety. 10 ft.
Bayberry (*Myrica pennsylvanica*). 5 ft.
Mockorange. *Philadelphus* in variety. 10 ft.
Red Berried Photinia (*Photinia villosa*). 15 ft.
Cinquefoil. *Potentilla* in variety. 3 ft.
Beach Plum (*Prunus maritima*). 8 ft.
Rugosa Rose (*Rosa rugosa*). 6 ft.
Pussy Willow (*Salix discolor*). 20 ft.

Spirea. *Spiraea* in variety. 3-10 ft.
Coralberry (*Symphoricarpos vulgaris*). 6 ft.
Lilac. *Syringa* in variety. 8-15 ft.
Tamarix. *Tamarix* in variety. 15 ft.
Blueberry (*Vaccinium corymbosum*). 8 ft.
Viburnum. (*Viburnum*, 17 varieties). 4-15 ft.
Kemp Tree (*Vitex macrophylla*). 4 ft.
Weigela. *Weigela* in variety. 8 ft.

VINES AND GROUND COVERS

Virginia Creeper (*Ampelopsis quinquefolia*).
Bearberry (*Arctostaphylos uva-ursi*).
Mme. Galen Trumpet creeper (*Bignonia tagliabuana*).
Oriental Bittersweet (*Celastrus orbiculatus*).
Hybrid Clematis. *Clematis* in variety.
Wintercreeper. *Euonymus radicans* in variety.
English Ivy. *Hedera helix* and varieties.
Honeysuckle. *Lonicera* in variety.
Japanese Spurge (*Pachysandra terminalis*).
China Fleecevine (*Polygonum auberti*).
Myrtle. *Vinca minor* and varieties.
Wisteria. *Wisteria* in variety.

ROSES

We grow a limited number of Climbers and Floribundas in containers, in popular colors and the best varieties for Long Island.

Oak Park's Selection of Choice

For many years Oak Park has devoted a great deal of effort to produce the finest possible broadleaf evergreens. The following list is not an exhaustive one, but it does give an indication of the wide variety of plants we have available in this category. Numerals indicate approximate ultimate height without pruning.

Glossy Abelia (*Abelia grandiflora*). 3 ft. Pink blossoms. July-Nov.

Prostrate Glossy Abelia (*Abelia grandiflora prostrata*). 1½ ft. White blossoms. July-Nov.

Azalea, Glenn Dale Hybrids. 3 ft. Various colors. May-July.

Azalea, Joseph Gable's Hybrids. 3 ft. Various colors. May and June.

Kurume Azalea (*Azalea kurume*). 3 ft. Various colors. May and June.

Chenault Barberry (*Berberis chenaulti*). 5 ft. Yellow blossoms in April, blue fruit in fall.

Wintergreen Barberry (*Berberis julianae*). 8 ft. Yellow blossoms in April, blue fruit in fall.

Dwarf Wintergreen Barberry (*Berberis julianae nana*). 3 ft. Yellow blossoms in April, blue fruit in fall.

Warty Barberry (*Berberis verruculosa*). 2 ft. Yellow blossoms in April, black fruit in fall.

Spreading Euonymus (*Euonymus patens*). 10 ft. White blossoms in June, pink fruit in fall.

English Holly (*Ilex aquifolium*). 30 ft. Red fruit in fall.

Chinese Holly (*Ilex cornuta burfordi*). 10 ft. Red fruit in fall.

Upright Japanese Holly (*Ilex crenata*). 10 ft. Black fruit in fall.

Spreading Japanese Holly (*Ilex crenata*). 3 ft. Black fruit in fall.

Boxleaf Japanese Holly (*Ilex crenata convexa*). 4 ft. Black fruit in fall.

Heller's Dwarf Japanese Holly (*Ilex crenata helleri*). 3 ft.

Littleleaf Japanese Holly (*Ilex crenata microphylla*). 6 ft. Black fruit in fall.

Roundleaf Japanese Holly (*Ilex crenata rotundifolia*). 6 ft.

Inkberry (*Ilex glabra*). 8 ft. Black fruit in fall.

American Holly (*Ilex opaca*). 30 ft. Red fruit in fall.

Mountain Laurel (*Kalmia latifolia*). 8 ft. Pink-white blossoms in June.

Leucothoe (*Leucothoe catesbaei*). 4 ft. White blossoms in May.

Suwannee River Waxleaf Privet (*Ligustrum lucidum* S. R.). (Plant Pat. No. 1402). 4 ft.

Oregon Hollygrape (*Mahonia aquifolium*). 4 ft. Yellow blossoms in April, blue fruit in fall.

Leatherleaf Hollygrape (*Mahonia Beali*). 6 ft. Yellow blossoms in April, blue fruit in fall.

Holly Osmanthus (*Osmanthus illicifolius*). 20 ft. White blossoms and blue-black fruit in fall.

Chinese Photinia (*Photinia serrulata*). 30 ft. White blossoms in May.

Mountain Andromeda (*Pieris floribunda*). 3 ft. White blossoms in April.

Japanese Andromeda (*Pieris japonica*). 10 ft. White blossoms in April.

English Laurel (*Prunus laurocerasus officinalis*). 20 ft. White blossoms in May.

Shipka Laurel (*Prunus laurocerasus schipkaensis*). 4 ft. White blossoms in May.

Laland Firethorn (*Pyracantha coccinea lalandi*). 12 ft. White blossoms in May, orange fruit in fall.

Loboy Firethorn (*Pyracantha coccinea Loboy*). 3 ft. White blossoms in May, orange fruit in fall.

Wyatt Firethorn (*Pyracantha coccinea wyatti*). 12 ft. White blossoms in May, red fruit in fall.

Pink Carolina Rhododendron (*Rhododendron carolinianum*). 6 ft. Pink blossoms in May.

White Carolina Rhododendron (*Rhododendron carolinianum alba*). 6 ft. White blossoms in May.

Catawba Rhododendron (*Rhododendron catawbiense*). 8 ft. Lavender blossoms in June.

Hybrid Rhododendron (*Rhododendron hybrida*). 12 ft. Various color blossoms in June.

Rosebay Rhododendron (*Rhododendron maximum*). 15 ft. White or pink blossoms in June.

Japanese Skimmia (*Skimmia japonica*). 3 ft. Red fruit in fall.

BROADLEAF EVERGREENS

EVERGREEN AZALEA (*Azalea kurume*)

The ARISTOCRATS of the PLANT WORLD

With their year 'round evergreen foliage and colorful array of blossoms, they offer the wise buyer more satisfaction during all seasons of the year than any other group of plants. Many are slow growing and low in growth, making them particularly useful for foundation plantings. Others are unexcelled as a background for garden flowers.

RED
HYBRID
RHODODENDRON

CHINESE HOLLY (*Ilex cornuta burfordi*)

WINTERGREEN BARBERRY (*Berberis julianae*)

GLOSSY ABELIA (*A. grandiflora*)

ROCK COTONEASTER (*C. horizontalis*)

LALAND FIRETHORN (*Pyracantha lalandi*)

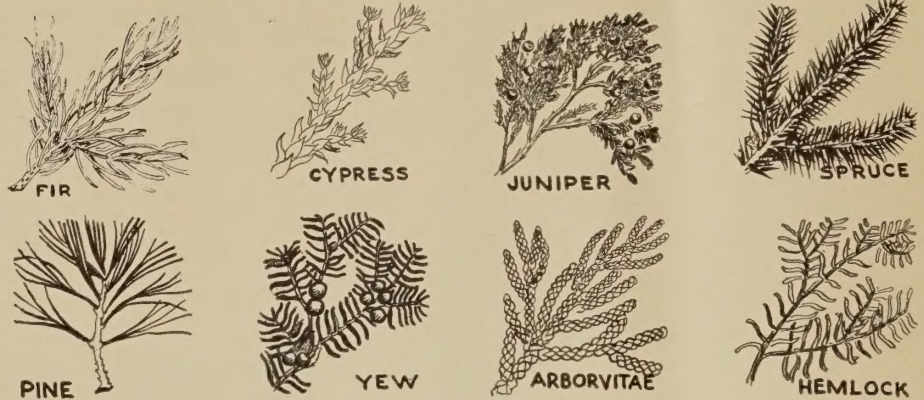

MOUNTAIN LAUREL (*Kalmia latifolia*)

JAP. ANDROMEDA (*Pieris japonica*)

Enjoy the Dependable All-Year Beauty of

Here are some typical types of narrow-leaved evergreen foliage to help you identify the better known families. They illustrate what a diversity of needle textures this group offers. A careful selection of different textures, colors and growth habits is what gives an evergreen planting outstanding character.

Space doesn't permit any more than a very brief description of these choice evergreens, but we wanted to include most of our best ones to show what a wide range this group offers. Numerals indicate approximate ultimate height without pruning. Colors are needle colors.

Oak Park **EVERGREENS**

One of Nature's outstanding groups, the narrow-leaved evergreens are gracious and cool looking in summer and cozy and comfortable in winter. With greens of every shade and hue, contrasted with blue, gold and gray, their foliage is always pleasing. Pyramidal, globular or spreading, there are forms for every use. We are proud of our skillfully grown evergreens, confident that they will please the most discriminating buyers.
